- Delete Themes
- Edit Themes
- Copy Themes
- Saving

Overview

[top](#)

Themes are style settings that are applied to Storyboards in order to provide layout and formatting to slides. In order to access a Theme you will need to Navigate to **Administration > Admin Console > Storyboard Themes**.

See [Main Theme](#) and [Section Theme](#) for more information on Theme Settings.

Example

Theme	Preview
No Theme	

Keys	 <p>The same Table of Contents slide with Yellowfin's sample Keys theme applied.</p>
Think Tank	 <p>The same Table of Contents slide a third time, with a blue Yellowfin Think Tank theme applied to it.</p>

Add Themes

[top](#)

While viewing the Storyboard Themes list in the **Admin Console**, click the **Add** button to create a new theme.

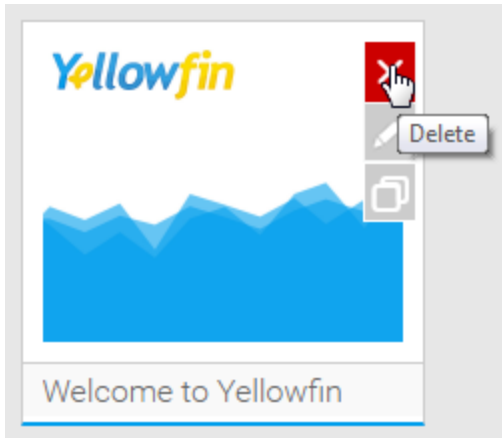

Once clicked you will be taken to the theme builder where you will need to define the formatting options for your storyboard theme.

See [Main Theme](#) and [Section Theme](#) for more information on Theme Settings.

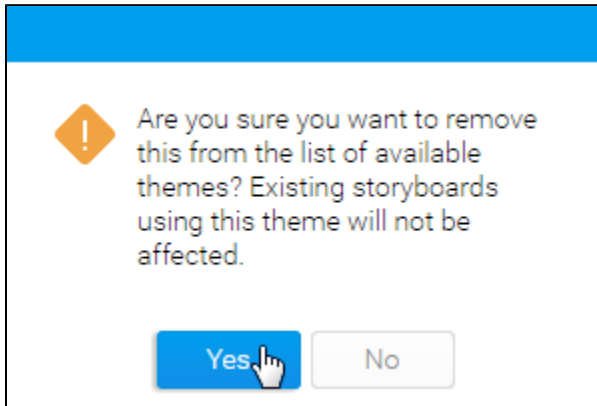

Delete Themes

[top](#)

While viewing the Storyboard Themes list in the **Admin Console**, hover over the Theme you wish to remove and click on the **Delete** button on the top right corner.

You will now be presented with a confirmation window for the deletion. Click **Yes** to confirm or **No** to cancel.

Edit Themes

[top](#)

While viewing the Storyboard Themes list in the **Admin Console**, hover over the Theme you wish to remove and click on the **Edit** button on the top right corner. You will now be taken to the Theme Builder to make required changes.

See [Main Theme](#) and [Section Theme](#) for more information on Theme Settings.

Copy Themes

[top](#)

While viewing the Storyboard Themes list in the **Admin Console**, hover over the Theme you wish to copy and click on the **Copy** button on the top right corner. You will now be taken to the Theme Builder to make changes to a new copy of the selected Theme, completely separate from the original. This is an excellent way to learn how to set up themes, and can save you a lot of time if you want similar themes, just with different image sets, etc.

See [Main Theme](#) and [Section Theme](#) for more information on Theme Settings.

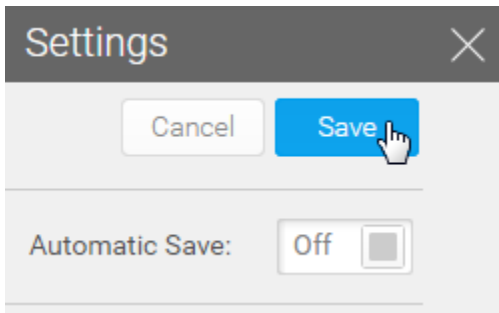

Saving

[top](#)

When you are editing a Theme, you have the option to enable/disable Automatic Saving. Auto saving saves the theme after every adjustment made. Sometimes you may want to make a large number of adjustments so you may turn Automatic Save off.

In order to turn off Automatic Save, click on the on/off toggle. You will now be provided with a Save button which you will need to use to commit all your changes once made, or a Cancel button to revert the Theme back to the last saved settings.
