

# Administration

- [Overview](#)
- [Administration Menu](#)
  - [Available Functions](#)

## Overview

[top](#)

The Administration area contains all the system, user, and content settings required to setup and maintain Yellowfin's use.

Administrator users are there to ensure:

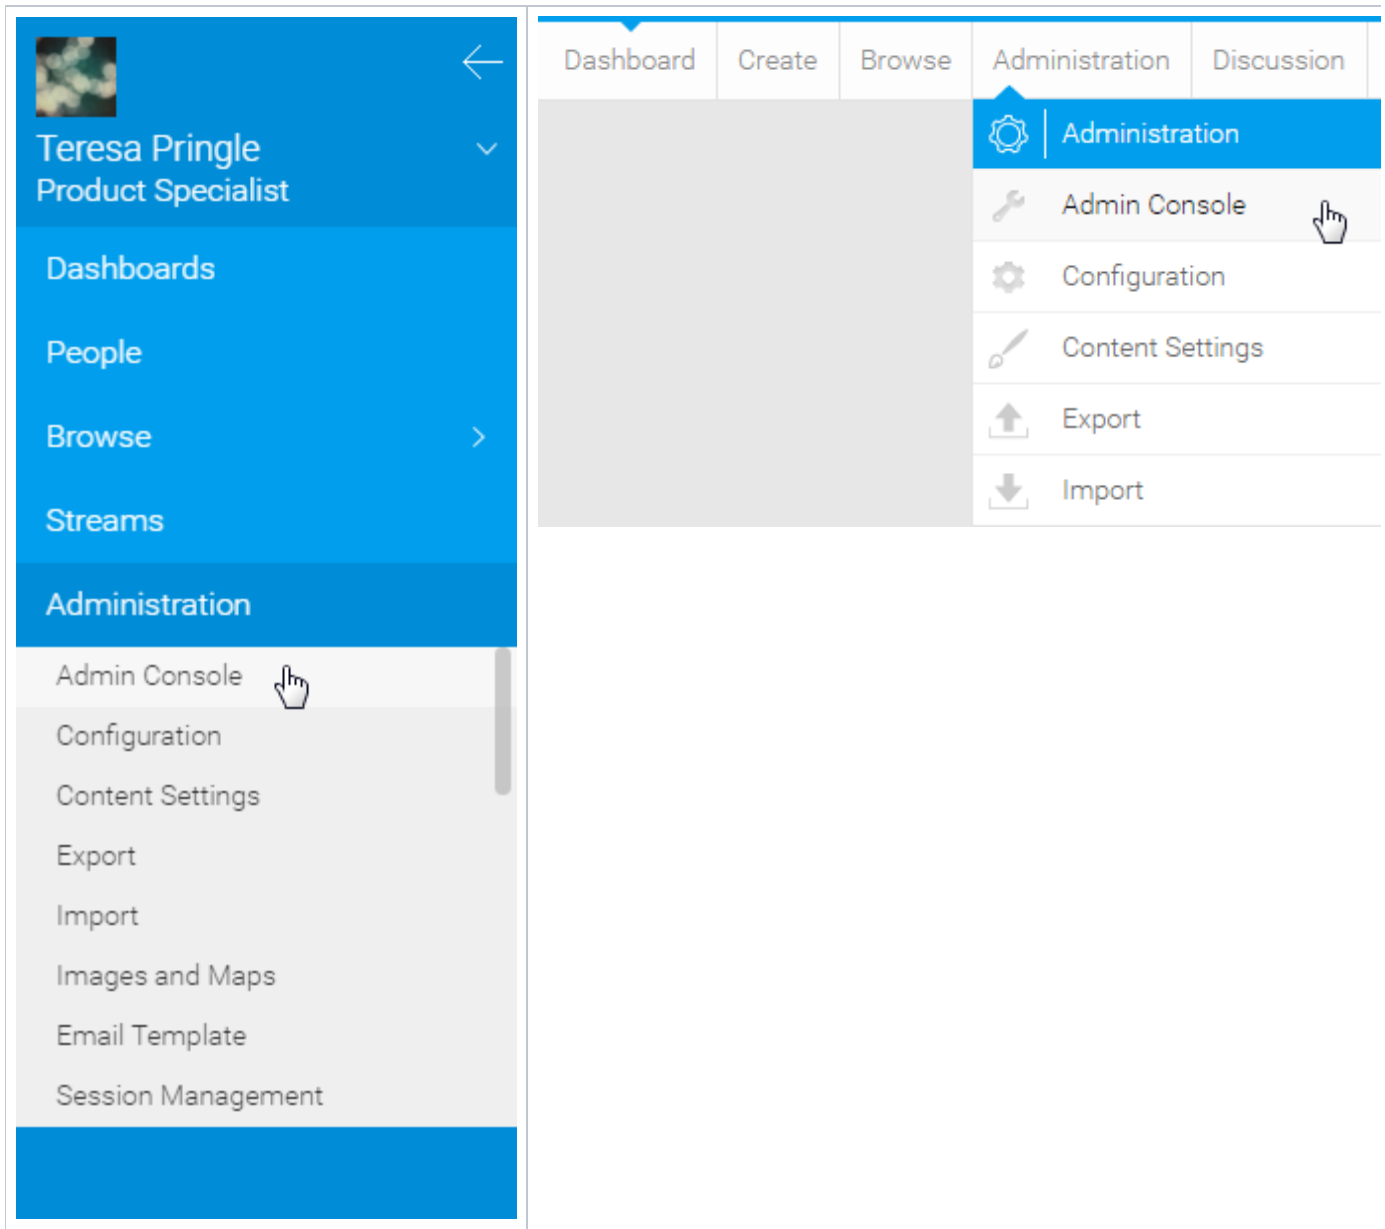

1. Users have appropriate access to the **system**. This is done by creating users, assigning [role permissions](#), and defining any [source filter](#) requirements.
2. Users have appropriate access to **data**. This is done by creating and assigning access to [Data Sources](#) and [Views](#).
3. Users have appropriate access to **content**. This is done by creating and assigning access to [Content Folders](#).
4. The system is correctly **configured**. This is done by defining the [Configuration](#) and [Content Settings](#) settings required.

## Administration Menu

[top](#)

The Administration controls are accessed through the main navigation menus.

<b>Left Side Navigation</b>	<b>Toolbar</b>
-----------------------------	----------------

## Available Functions

Once the user has clicked on the **Administration** link they will be provided with the following options:

Option	Left Side	Toolbar	Description
<a href="#">Admin Console</a>	✓	✓	This link will take you straight to the main <a href="#">Admin Console</a> page, rather than providing a short cut to one of the main admin components.
<a href="#">Configuration</a>	✓	✓	This link will take you to the <a href="#">Configuration</a> page, allowing you to customise Yellowfin settings, such as authentication, integration (headers, footers, and navigation), page formatting, email server and defaults, system parameters, and regional settings.
<a href="#">Content Settings</a>	✓	✓	This link will take you to the <a href="#">Content Settings</a> page, allowing you to manage the way Yellowfin displays each type of content.
<a href="#">Export</a>	✓	✓	This link will take you to the <a href="#">Export</a> page, allowing you to save an xml file defining selected pieces of content for use as backups or to transfer to different instances of Yellowfin.
<a href="#">Import</a>	✓	✓	This link will take you to the <a href="#">Import</a> page, allowing you to select and upload a xml file that defines pieces of content you wish to add to the system.
<a href="#">Images &amp; Maps</a>	✓	✗	This will take you to the <a href="#">Images &amp; Maps</a> page, allowing you to manage images, raster maps, and wms layers in the system.

Email Template	✓	✗	This will take you to the <a href="#">Email Template</a> page, allowing you to customise the style of automated emails sent from the system.
Session Management	✓	✗	This will take you to the <a href="#">Session Management</a> page, allowing you to view and manage the current sessions in the system.
Schedule Management	✓	✗	This will take you to the <a href="#">Schedule Management</a> page, allowing you to view and manage all schedules in the system.
Dashboard Management	✓	✗	This will take you to the <a href="#">Dashboard Management</a> page, allowing you to view and manage the dashboard tabs in the system.
Licence Management	✓	✗	This will take you to the <a href="#">Licence Management</a> page, allowing you to view, update, and schedule reminders for the system licence.
Background Execution	✓	✗	This will take you to the <a href="#">Background Execution</a> page, allowing you to manage current queued and running report queries.
Plugin Management	✓	✗	This will take you to the <a href="#">Plugin Management</a> page, allowing you to manage all plugins in the system.
System Information	✓	✗	This will take you to the <a href="#">System Information</a> page, which provides you with technical information required for maintenance and troubleshooting.
Content Translation	✓	✗	This will take you to the <a href="#">Content Translation</a> page, which will allow you to manage all translations you've provided for content in the system.
Client Orgs	✓	✗	This will take you to the <a href="#">Client Orgs</a> page, which will allow you to manage all Client Organisations in the system.
